Operates in Indonesia since the 90's

British consulting firm in Renewable Energies.

6 offices overseas

Local Partners

Grameen Shakti :
More than 100.000
Solar Home Systems
installed

PSL :
Renewable Energy
Consultants since 1969

Rahimafrooz solar:
Leader in battery and
SHS providing

YBUL :
NGO specialist in
Renewable Energies

**Optimal Power
Indonesia :**
Solar Energy company

Rendev objectives

RENDEV project aims to create the conditions of a large access to renewable energies for rural population:

- Awareness of the population on benefits of RNE
- Awareness of populations on affordability of RNE
- Capacities on RNE
- A sustainable financial model

RENDEV will promote a network of local experts to deal with those issues with the support of International experts.

RENDEV activities

Figures

3 years project : 2007-2009

4 national conferences

1 international conference

200 + trainings on the field

Budget: 670 000 €

Co-financed by Intelligent Energy Europe Executive Agency

National Conference Dissemination

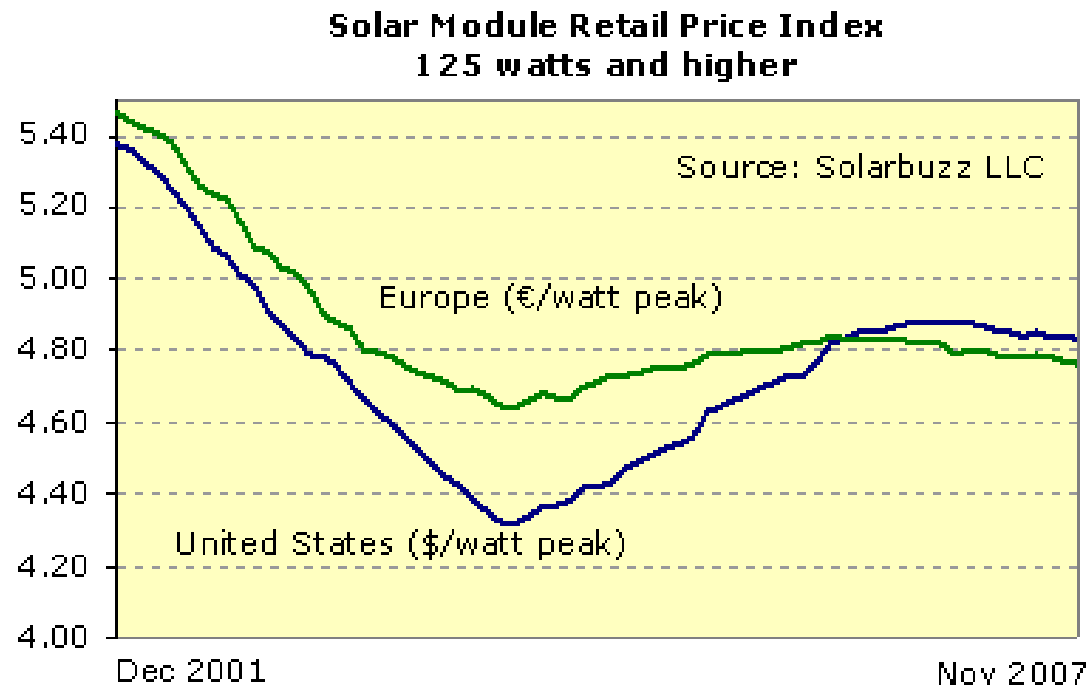

Solar PV Development in Indonesia

Objectives

Enhancing coordination

- Sharing the lessons learned and best practices
- Defining the common issues
- Discussing on solutions
- Agreeing on improvements in implementation

Time of opportunities

Silicon shortage is supposed to stop in 2010:

Opportunities for Indonesia to learn a lot before benefiting of competitive PV prices
